

Website Tips

www.flpbis.org

The Resource Spotlight includes a search feature that looks across all our webpages and binders. If you know the title of the resource you're looking for, it will be included in the search results along with other resources that contain those words in their titles.

SEARCH TIPS:

We try to include **important keywords** in our file names. When you search, think about **the main idea the resource addresses** (reward, data, classroom, restraint, etc.).

Try to use **complete words** in your search instead of acronyms. If you use an acronym, the system will return resources with that character string in the title.

Avoid using numbers in your search (such as "Tier 1," "Tier 2," and "Tier 3") because the system has a hard time distinguishing single numbers from number strings (e.g., "2019").

Let us help! You can contact your TA provider through the website. If you're unsure who that may be you can direct your question to Therese Sandomierski (on the "FLPBIS Staff" page).
